

CNY Communications, Inc., Internet Redundancy Provider

CNY Communications offers true redundancy for your Internet connection, as well as the ability to share the bandwidth between two or more providers at the same time to maintain uptime, and reduce your monthly cost. As an example, if you need 1.5Mbps of bandwidth, and are currently paying \$500 - \$900 per month for a T-1, you can downgrade the T-1 to a DSL and add the same amount of bandwidth through our wireless link for a fraction of the cost (\$80 - \$250 per month). In most cases, we are able to save our customers 40% - 60% off their current monthly communications expenses, including and maintaining a landline connection.
